SUMMARY

UX/Product designer who works from a simple principle: **design for intent and human emotion** — start from what people are actually trying to do and how they feel doing it, not just what they tap. My strength is **research and product reasoning**: digging into a problem, mapping the real user need, and finding a clear path through it. My focus is **design for AI and everyday products** — trust, uncertainty, and **human-in-the-loop** correction that keeps people in control. Grounded in **UX research, user flows, information architecture, wireframing, prototyping, and reusable UI patterns**, working in Figma and Framer.

CORE COMPETENCIES

Design for AI: Designing for uncertainty · trust & transparency · human-in-the-loop / correction loops · confidence & error states · AI-assisted workflows

UX: UX research · personas · journey mapping · user flows · information architecture · wireframing · prototyping · interaction design

Systems & Delivery: reusable UI patterns & style systems · responsive / mobile-first design · no-code build (Framer)

Tools: Figma · Framer · Notion · Canva · CapCut · After Effects (basic) · AI design tools

EXPERIENCE

UI/UX Designer — Craft Studioo (client project)

Jan 2025 – Dec 2025

- Designed and built a creative agency's website from scratch in Framer — **design and copy** — translating the client's positioning into a clear, conversion-focused site.
- Created a consistent, **reusable set of styles and UI patterns** across the site, keeping the visual language coherent and making new pages faster to build.
- Designed **mobile-first and responsive**, structuring the layout and user flow so the core journey worked cleanly on smaller screens.
- Iterated the design through **client review cycles**, incorporating feedback from the agency's team to refine layout, content, and flow before launch.

Graphic Designer & Social Media Lead — Al Noor Youth Committee

Jun 2023 – Dec 2024

- Designed banners, posts, and event graphics and helped run the Instagram and Facebook accounts, producing a cohesive **visual system** that standardised branding across events.
- Owned the **visual direction** for a community awareness campaign end-to-end, from concept through the on-the-day assets.
- Kept output consistent across platforms by building a repeatable content-template kit that cut per-post production time.

SELECTED PROJECTS

Fitbite — Healthy Meal Delivery · UX Case Study · Concept [\(View case study\)](#)

- End-to-end product case study, built solo: validated pain points through research, scored **20+ solutions on user value and business viability**, then designed the flows, design system, screens, and prototype — with an AI meal-scan (confirm-or-edit) as one design-for-AI touchpoint.

Where Did My Money Go — UPI Auto-Categorisation · Concept [\(View case study\)](#)

- Designed the concept end-to-end — flows, screens, and prototype, worked through **with AI as a design collaborator** — for on-device auto-categorisation of UPI payments using **confidence-gated auto-filing** (filing when certain, asking when not) with one-tap corrections, designing directly for AI uncertainty and privacy.

Diney — Modern Dining Experience · Concept [\(View case study\)](#)

- Self-directed concept study: analysed common dine-in and food-delivery pain points, then designed and **prototyped** a clean, interactive interface focused on task completion and a smooth ordering flow.

EDUCATION & CERTIFICATIONS

B.Sc. in Botany — Marwari College, Kishanganj, Bihar (2023 – 2027)

Certifications: UX & UI Design — Certifier · FutureLearn · Great Learning (2024) **Languages:** English · Hindi · Urdu

Community: Coordinated three blood-donation drives with a 15+ volunteer team — Al Noor Youth Committee (2023 – 2025).
